

**Digital Health &
Discovery Platform**

Benefits of DHDP Membership

The Digital Health and Discovery Platform (DHDP) is a pan-Canadian initiative that brings precision medicine and personalized care to patients with cancer and neurodegenerative disease through the application of big data and artificial intelligence.

Network

Members will participate in a collaborative network of over 90 partners, including:

- Hospitals, healthcare institutions and universities
- Foundations and non-governmental organizations
- Large corporations, small- and medium-sized enterprises, and investors
- Artificial Intelligence (AI) institutes
- Provincial and federal government partners

Innovation

Members will help create and have access to:

- A cutting-edge technological infrastructure that facilitates federated learning
- Policies that govern health data access within a privacy-by-design framework
- Learnings derived from the use of state-of-the-art AI approaches to analyze healthcare data generated across Canada

Social & Economic Benefits

Members will play an active role in a groundbreaking initiative that:

- Creates a 'network effect' to accelerate innovation, and stimulates commercialization of Canadian research discoveries in digital health, contributing to Canada's knowledge economy
- Provides access to new funding that supports the training of the next generation of thought leaders at the intersection of AI and healthcare
- Helps improve health outcomes for all Canadians through the advancement of precision medicine in cancer and neurodegenerative diseases
